-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Specification

2. On page 1 (line 3), after "2002", insert -- , now U.S. Patent No. 6,666,159, --

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Vanderfeltz et al.

Vanderfeltz et al. discloses an apparatus (figure 1) having a towing vessel, and a skeletal towing frame fitted above the vessel for supporting an elevated tow rope attachment point. The towing frame has a first and second vertical supports [7], and a third vertical support [14] extending upwardly and aft. A horizontal bridging portion [5] is provided to bridge the

vertical supports. The attachment point is positioned at a level that is above a level of operator's station.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Vanderfeltz et al in view of Sell.

Vanderfeltz et al. discloses a tow apparatus with vertical supports, as above, with all limitations of claim 1.

Vanderfeltz et al. is silent on the vertical supports being rotatable for storage.

Sell describes the vertical towing supports being rotatable (figure 2).

It would have been obvious for one skilled in the art at the time of the invention to make the vertical supports of Vanderfeltz et al. rotatable, as taught by Sell. Making the supports rotatable would enable storage of the tow apparatus without a need for its removal from the deck of the boat.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kane, McCulloh, Jelks, Eisner, Meek, Haugland, Morch, JP (274) and JP (195) show tow structures.

8. Applicant is cautioned that all future Office Actions will carefully review the double patenting issues with respect to the applicant's previously issued patents. Therefore, in order to expedite the prosecution, the applicant is advised to give careful consideration to this issue prior to submitting any future amendment.
